IMMUNOLOGY TODAY

REFERENCE EDITION

Volume 8

1987

CONTENTS

January

page

news and features

*Characterization of human leukocyte differentiation antigens**
Stephen Shaw 1

Histocompatibility antigens and chemical reactivity in autoimmunity
Hubert Kolb, Klaus V. Toyka and Ernst Gleichmann 3

announcement for teachers of immunology 7

notes 7

letters

Fibroblast proliferation in vitro *and fibrosis*
J.T. Beranek 8

HIV is an inappropriate name for the AIDS virus
Per Brandtzaeg 8

Lentiviruses and mycobacterial diseases
Stella Barnass 9

On the interaction between antigen and MHC molecules
Brian H. Barber 9

rostrum

The two-chain structure of high affinity IL-2 receptors
Kendall A. Smith 11

Suppression of IgE responses following inhalation of antigen
Patrick G. Holt and Jonathon D. Sedgwick 14

commentary

Control of messenger RNA stability
David Cosman 16

reviews

The immunology of new generation vaccines
Maurizio Zanetti, Eli Sercarz and Jonas Salk 18

Protein antigenicity: a static surface property
Jiri Novotny, Mark Handschumacher and Robert E. Bruccoleri 26

February

news and features

Methodological issues in behavioural immunology
J. John Cohen 33

Still more genes in the MHC
John Trowsdale 35

rostrum

CD5-positive B cells in rheumatoid arthritis and chronic lymphocytic leukemia
Peter M. Lydyard, Pierre Y. Youinou and Anne Cooke 37

I–E expression and susceptibility to parasite infection
Donald L. Wassom, Christopher J. Krco and Chella S. David 39

commentary

The antibody combining site: retrospect and prospect
Anthony R. Rees 44

reviews

The interleukin-1 receptor
Steven K. Dower and David L. Urdal 46

Synthetic peptides: a next generation of vaccines?
M.W. Steward and C.R. Howard 51

Changes in the immune system during metamorphosis of Xenopus
Martin F. Flajnik, Ellen Hsu, James F. Kaufman and Louis Du Pasquier 58

***see errata**

book reviews
Monoclonal Antibodies in Clinical Diagnostic Medicine
Monoclonal Antibodies in Haematopathology (Serono Symposium Vol. 26)
Monoclonal Antibodies (Methods in Haematology Vol. 13)
Alison H. Goodall 64
*Immunotoxicology of Drugs and Chemicals**
Pierluigi E. Bigazzi 65
Introduction to Medical Immunology
Clinical Immunology Illustrated
D. Isenberg 65

books received 66

March

news and features
Antigen recognition by T lymphocytes
Peter Cresswell 67
Proposed classification of leukocyte-associated cytolytic molecules
H.S. Koren, R. Goldfarb, P. Henkart, C. Bleackley, B. Bonavida, G. Granger, M. Palladino, E. Podack, C. Reynolds, N. Ruddle and H.W.L. Ziegler-Heitbrock 69

announcement for teachers of immunology 72

notes 72

letters
Experimental autoimmune thyroiditis induced by recombinant interferon-γ
Jean-Jacques Rémy, Jean Salamero, Marc Michel-Bechet and Jeannine Charreire 73
Do natural autoantibodies prevent autoimmune disease?
P.R.J. Burch and N.R. Rowell 73
Anti-DNA antibodies by ELISA
Jean-Louis Preud'Homme; 74
S. Ghosh and A.M. Campbell 75
Cross-reactivity of anti-dsDNA antibodies
Ronald P. Taylor and Jeffrey C. Edberg 75

rostrum
Immunoregulation by Fc signals
N.R. St.C. Sinclair and A. Panoskaltsis 76
T cells recognize antigen alone and not MHC molecules
Ole Werdelin 80

commentary
Interferon β_2 as a promoter of growth and differentiation of B cells
Alfons Billiau 84

reviews
Total lymphoid irradiation
Shimon Slavin 88
The regulation of immune responses to dietary protein antigens
Allan Mcl. Mowat 93

book reviews
Retroviruses and Human Pathology
The Human Oncogenic Viruses
Angus Dalgleish 99

books received 99

April

news and features
Immunological intervention with monoclonal antibodies
P.C.L. Beverley and G. Riethmuller 101
Immunotoxicology and the new biotechnology
Joy Cavagnaro 102

rostrum
Is tolerance the result of engaging surface Ig of B cells in cycle?
David W. Scott and Norman R. Klinman 105
A functional model of the human C1 complex
Gérard J. Arlaud, Maurice G. Colomb and Jean Gagnon 106
The role of immunoglobulin heavy chain binding protein in immunoglobulin transport
Linda Hendershot, David Bole and John F. Kearney 111

commentary
Inappropriate rearrangement of immunoglobulin and T-cell receptor genes
Melvyn F. Greaves, Andrew J.W. Furley, Li C. Chan, Anthony M. Ford and Harald V. Molgaard 115

reviews
*Some new perspectives on transplantation immunity and tolerance**
Willys K. Silvers, Hiromitsu Kimura, Lise Desquenne-Clark and Megumu Miyamoto 117
The regulation of antibody class expression
Judy M. Teale and Kristin M. Abraham 122

book reviews
Interferon Treatment of Human Neoplasia (Advances in Cancer Research, Vol. 46)
F.W. Balkwill 127
Atlas of Immunohistology
Per Brandtzaeg 127

May

news and features
Tumor necrosis factor and related cytotoxins
Nancy H. Ruddle 129

notes 131

letters
Natural autoantibodies might prevent autoimmune disease
Roman Dziarski; 132
N.R.St.C. Sinclair and A. Panoskaltsis 132

rostrum
Why do hemopoietic growth factor receptors interact with each other?
Nicos A. Nicola 134
Are proteinases functional molecules of T lymphocytes?
M.D. Kramer and M.M. Simon 140

commentary
Microenvironments for B-cell production and stimulation
Ernst Heinen and Rikiya Tsunoda 142
The T-cell antigen receptor gamma chain and its accomplices
A.W. Boylston 144

reviews
Macroglia: neural cells responsive to lymphokines and growth factors
Jean. E. Merrill 146
Molecular mechanisms of signal transduction in macrophages
Thomas A. Hamilton and Dolph O. Adams 151

book reviews
The Natural History of the Major Histocompatibility Complex
Michael Edidin 159
Immunology of Endocrine Diseases;
Autoimmunity: Experimental and Clinical Aspects
George S. Eisenbarth 160
HLA Class II Antigens: A Comprehensive Review of Structure and Function
K. Guy 161

June

news and features
The development of immunology in Yugoslavia
Branko Vitale 163
Islet-cell and insulin autoantibodies in diabetes
Helga Gleichmann and Gian Franco Bottazzo 167

notes
Joseph Feldman retires from Journal of Immunology 169

letters
Transmission of AIDS
Deborah J. Anderson 170
CD nomenclature for mouse antigens?
Edward A. Clark 170

rostrum
Is there a role for MHC class I antigens in the elimination of somatic mutants?
T.V. Rajan 171
Natural killer activity: the definition of a function rather than a cell type
Craig W. Reynolds and John R. Ortaldo 172

commentary
Activation of a gene activator
Iswar K. Hariharan and Nick Gough 175
Non-H-2 histocompatibility antigens: can they be retroviral products?
Elizabeth Simpson 176

reviews
Lymphokine-activated killer cell activity
Ronald B. Herberman and others 178
Carbohydrate antigens as possible parasite vaccines
E. Handman, M.J. McConville and J.W. Goding 181

reprinted review
Some new perspectives on transplantation immunity and tolerance
Willys K. Silvers, Hiromitsu Kimura, Lise Desquenne-Clark and Megumu Miyamoto 185

July/August

news and features
Bone marrow stromal cells and their factors regulate B-cell differentiation
Kenneth Dorshkind 191
Towards an AIDS vaccine: challenges and prospects
Jacques Homsy, Kathelyn Steimer and Richard Kaslow 193
The effects of space flight on immunocompetence
William R. Beisel and John M. Talbot 197

notes
New publication available for researchers
Jean Juillard Prize
Immunology congress report
The NKH1/Leu 19 antigen on NK cells
Industrial biotechnology R&D
Erratum 201

letters
T cells recognize antigen alone and not MHC molecules
Jean-Michel Claverie, Gérard Chaouat, Chantal Rabourdin-Combe and Philippe Kourilsky; 202
Ole Werdelin 202
Cytokines in autoimmunity
Klaus Bendtzen, Åse Krogh Rasmussen, Karine Bech, Ulla Feldt-Rasmussen and Jørn Egeberg 203

rostrum
The CD4 molecule, the human immunodeficiency virus and anti-idiotypic antibodies
Paolo del Guercio and Maurizio Zanetti 204
Is allograft rejection a clue to the mechanism promoting MHC polymorphism?
Leif Andersson, Svante Pääbo and Lars Rask 206
The multifactorial etiology of graft-versus-host disease
Gijsbert C. de Gast, Jan Willem Gratama, Olle Ringden and Eliane Gluckman 209
Separation of self from non-self in the complement system
John P. Atkinson and Timothy Farries 212
The 65 kDa antigen of mycobacteria – a common bacterial protein?
Douglas B. Young, Juraj Ivanyi, Josephine H. Cox and Jonathan R. Lamb 215

commentary
Antibody-mediated graft versus host reactions in renal transplantation
William M. Baldwin, III and Fred Sanfilippo 219
Soluble class I antigens: a conundrum with no solution?
Detlef Güssow and Hidde Ploegh 220

reviews
Two types of mouse helper T-cell clone – implications for immune regulation
Tim R. Mosmann and Robert L. Coffman 223
Immune regulation in schistosomiasis japonica
Abram B. Stavitsky 228
'Nonspecific' MHC-unrestricted killer cells and their receptors
Peter Hersey and Reinder Bolhuis 233
The recognition of influenza A virus-infected cells by cytotoxic T lymphocytes
David C. Wraith 239
The immunobiology of Chlamydia
Daniel Levitt and Jon Bard 246

book reviews
Clinical Transplants 1986
Peter Morris 251

books received 251

September

news and features

Bone marrow purging
George Janossy 253

Generation and maintenance of hybridomas
J.F. Albright, B. Janicki and M.D. Scharff 256

letters

Nomenclature of non-MHC-restricted cytotoxicity
H.F. Pross 257

Seminal plasma and AIDS
Michael J. Turner, John O. White and W. Patrick Soutter; 258
Steven S. Witkin 258

rostrum

The stepwise activation of cytotoxic T lymphocytes
Gianni Gromo, Luca Inverardi, Robin L. Geller, Barbara J. Alter and Fritz H. Bach 259

Complement and the regulation of humoral immune responses
Erik C. Böttger and Dieter Bitter-Suermann 261

Are MHC class-II restricted cytotoxic T lymphocytes important?
Erik Braakman, Francien T.M. Rotteveel, Grada van Bleek, Gijs A. van Seventer and Cornelis J. Lucas 265

reviews

Phenotypically and functionally distinct T-cell subsets in anti-tumor responses
Toshiyuki Hamaoka and Hiromi Fujiwara 267

Antigen processing at the molecular level
Paul M. Allen 270

Mutations of class II MHC molecules
Laurie M. Glimcher and Irwin J. Griffith 274

The origin and significance of anti-DNA antibodies
David Isenberg and Yehuda Shoenfeld 279

October

news and features

Metchnikoff, Bordet, Oudin and immunology today: the Pasteur Institute's first 100 years
Guy Bordenave and Paolo Truffa-Bachi 283

Functional characteristics of cells infiltrating rejected allografts
J.P. Soulillou 285

notes 288

rostrum

A model for the transcriptional regulation of MHC class II genes
Kate E. Sullivan, Andrew F. Calman, Mikiye Nakanishi, Sue Y. Tsang, Yao Wang and B. Matija Peterlin 289

The T-cell antigen receptor gamma gene: rearrangements and cell lineages
James P. Allison and Lewis L. Lanier 293

commentary

The treatment of adenosine deaminase deficiency
R. Michael Blaese, Donald B. Kohn and Robert C. Moen 296

centre-page diagram

Sequence patterns in domains of the immunoglobulin superfamily
Alan F. Williams

reviews

A year in the life of the immunoglobulin superfamily
Alan. F. Williams 298

Regulatory structures on the V and C regions of immunoglobulin molecules
Paolo del Guercio 304

The surface antigens of human B lymphocytes
H. Zola 308

book reviews

Food Allergy and Intolerance
Handbook of Food Allergies
Hugh A. Sampson 315

November

new and features

Fifty years of H–2 research
George A. Carlson 317

Mapping the autoimmunizing epitopes on acetylcholine receptors
Gillian Harcourt and Andy Jermy 319

letters

MHC class I antigens and somatic mutants
Giorgio Parmiani 322

rostrum
How antibodies recognize virus proteins
P.M. Colman, G.M. Air, R.G. Webster, J.N. Varghese, A.T. Baker, M.R. Lentz, P.A. Tulloch and W.G. Laver 323
Self-tolerance for erythrocytes is not maintained by clonal deletion of T helper cells
D. Craig Hooper 327

commentary
Interleukin 1 and T-cell activation
Steven B. Mizel 330

Is cataract formation an autoimmune phenomenon?
Jerry Y. Niederkorn 332

reviews
The ISCOM: an immunostimulating complex
B. Morein, K. Lovgren, S. Höglund and B. Sundquist 333
The molecules controlling B lymphocytes
John Gordon and Graeme R. Guy 339
Platelet-activating factor and cellular immune responses
Pierre Braquet and Marek Rola-Pleszczynski 345

book reviews
Paradoxes in Immunology
G.G.B. Klaus 352

December

news and features
Mechanisms of clearance and processing of protein molecules
Åke Lernmark, R. Graham Q. Leslie and Ole Werdelin 353
The genetics of antibody V regions
Michael J. Taussig 356

editorial 360

letters
Transient, local immunosuppression in recurrent vaginitis
Steven S. Witkin 360
The 65kDa antigen of mycobacteria
Ian Orme 361

rostrum
Immunologic privilege in the eye and the fetus
J. Wayne Streilein and Thomas G. Wegmann 362
Altered expression of lymphocyte functional antigen in Down syndrome
G.M. Taylor 366

commentary
How do human immunodeficiency viruses enter cells?
Mark Marsh and Angus Dalgleish 369
Interferons and rheumatoid arthritis: insight into interferon biology?
Jeffrey Browning 372

reviews
The genetic origin of autoantibodies
R. Kofler, F.J. Dixon and A.N. Theofilopoulos 374
The regulation of human eosinophil function by cytokines
David S. Silberstein and John R. David 380
Clonal analysis of the cytolytic T-cell response to human tumors
Andrea Anichini, Guiseppe Fossati and Giorgio Parmiani 385

book reviews
The Principles of Immunology and Allergy
Stephen T. Holgate 390

Errata

Characterization of human leukocyte differentiation antigens
Stephen Shaw (January, pp. 1–3) 114
Immunotoxicology of Drugs and Chemicals (BR)
Pierluigi E. Bigazzi (February, p. 65) 131
Some new prospects on transplantation immunity and tolerance
Willys K. Silvers, Hiromitsu Kimura, Lise Desquenne-Clark and Megumu Miyamoto (April, pp. 117–122) 131 and 185
